

SYSTEMS AND METHODS FOR PROVIDING REAL-TIME SERVICES IN
AN INTERACTIVE TELEVISION PROGRAM GUIDE APPLICATION

Abstract of the Invention

[0207] An interactive television program guide application is provided that displays real-time information to a user. The interactive television program guide application may display alerts for indicating to the user the availability of real-time information. The interactive television program guide application may also display program listings with real-time information. In response to the user selecting a program listing, the interactive television program guide application may provide the user with an indication that real-time content related to the selected listing is available. In some embodiments, the real-time content is not the program corresponding to the selected program listing.
